Subject: Review of Exposure Drafts - Fair Work Commission - Vehicle Manufacturing Repair Services and Retail Award 2010 (MA000089)

To the Award Modernisation Team :

It is our understanding that the above Award has been referred to the award modernisation group to finalise the next exposure draft. The 4 Year Review of this award was previously being dealt with by Commissioner Bissett. Correspondence from the MTA Organisations and the AMWU were forwarded to Commissioner Bissett's Office in May this year identifying agreed amendments to the previous exposure draft issued in February 2019, and also any outstanding matters yet to be resolved, including overtime conditions for general casual employees. This matter has now been resolved and we hope to forward to you amendments to clause 6.6 of the current exposure draft to reflect the agreed position of parties. It is anticipated that these amendments could be incorporated in the upcoming exposure draft to reflect a more final document.

Please confirm your receipt of this email and if there is any further clarification required on the above.

With Kind Regards.

Michael Sheehan, MTA, South Australia.
