6 May 2024

Fair Work
Commission

Statistical report— Enterprise agreements & other bargaining data

This report provides information on agreement approval applications lodged with the Fair Work Commission (Commission) and lodgment information for other bargaining matters.

The report uses information collected from the Commission's case management system and the application material, including enterprise agreements (agreements) and Commission forms, to derive an average annualised wage increase (AAWI) for agreements lodged with the Commission. Further information about the data used in this report can be accessed in the [Information note \(pdf\)](#).

The information in this report is intended to complement published information from the Commonwealth Department of Employment and Workplace Relations (Department). This includes the Department's *Trends in Federal Enterprise Bargaining* quarterly report which contains information from its Workplace Agreements Database on approved enterprise agreements made in the federal workplace relations system.

The data in this report refers to agreement approval applications lodged within the period. Some applications may subsequently be withdrawn or not approved, however, the data will not be revised after publication. In 2021–22, approximately 2.3 per cent of agreement approval applications were withdrawn by the applicant and approximately 0.4 per cent of agreement approval applications were not approved or were dismissed.

The AAWI calculated in this report is based on agreement approval applications **lodged with the Commission and not on agreements approved** as presented in the Department's report.

Disclaimer: This document has been produced by staff of the Commission. Precautions have been taken to ensure that the information in this document is accurate, but the Commonwealth of Australia, its employees, officers and agents make no claim as to the accuracy, reliability, currency or completeness of the information in this document and do not accept any liability for any action taken in reliance upon or based on or in connection with this document. To the extent permitted by law, the Commonwealth of Australia, its employees, officers and agents exclude all liability for any loss arising by reason of breach of any duty (including liability for negligence and negligent misstatement) or as a result of any errors or omissions contained in this document.

Data definitions

Data item	Description
AAWI	<p>Average annualised wage increase.</p> <p>Method of calculation: For agreements with quantifiable wage increases, it is calculated as follows:</p> $100 \times \left\{ \left[\prod_{i=1}^N 1 + r_i \right]^{\frac{1}{d}} \right\} - 1$ <p>Where r_i = percentage increase of the i^{th} time N = the number of increases over the life of the agreement d = effective duration of the agreement in years</p> <p>Fortnightly AAWI estimates are based on the AAWI per employee, which is calculated by weighting AAWI per agreement by the number of employees covered.</p> <p>AAWI estimates in this report do not include greenfields agreements as there are no employees at the time the agreement is made. Greenfields agreements are included in the Department's report in its calculation of the AAWI.</p> <p>AAWI data examines only increases to the base rate of pay and do not take into account allowances and bonus payments that are paid separate to the base wage.</p> <p>Enterprise agreements for which average percentage wage increases could not be quantified (e.g. those with inconsistent increases between different classifications) are excluded from these estimates. See 'non-quantifiable wage increases'.</p>
Agreement approval applications lodged	<p>Applications made under s.185 of the <i>Fair Work Act 2009</i> received by the Commission in the timeframe specified in each table and chart below.</p> <p>In some instances, an application is subsequently withdrawn (cancelled by the applicant) or a variation to the matter is made (to fall under another section of the <i>Fair Work Act 2009</i>) after lodgment. If these occur prior to data finalisation, the application is excluded from the analysis in Section 1 only.</p>

Data item	Description
Application lodged by a Union	<p>Where the applicant is a union association as found in the registered organisation list.</p> <p>These applications do not capture all applications with union involvement and are limited to applications where the union is the applicant (i.e. the entity who lodged the application). This is in contrast to how the Trends in Federal Enterprise Bargaining report deals with union coverage.</p> <p><i>Under the Fair Work Act 2009 it is possible for a union to have been involved in bargaining for an agreement and not lodge the application. Whether a union is covered by an agreement is not determined until a Commission Member issues an approval decision.</i></p>
Consistent wage increase	<p>Magnitude of wage increases are identical across the duration of the agreement. This does not include agreement approval applications where there is only 1 increase in the application.</p>
Effective duration	<p>Difference in years between the expiry date or the date of the last wage increase (whichever is latest) and the commencement date or the date of the first increase (whichever is earliest). Those few agreements with a formal duration of less than one year are considered to have an effective duration of 12 months.</p> <p>As agreements analysed in this report have not been approved, commencement dates are assumed to be 15 days after lodgment (i.e., the median approval time for agreements approved in 2021–22). For agreements with quantifiable wage increases that contain a non-quantifiable wage increase on commencement, the commencement date is moved to the first quantifiable wage increase.</p>
Employees covered	<p>The number of employees covered by the agreement at the time the agreement was voted on. This is derived from the <i>Form F17 Employer’s declaration in support for approval of an enterprise agreement (other than a greenfield agreement)</i> (Form F17) at question 26.1.</p>
Largest industries	<p>Industries with the highest number of employees covered by agreements lodged in the fortnight.</p> <p>The listed industries are taken from the Commission’s case management system which categorises applications consistent with the list of industries on the Commission’s website.</p>

Data item	Description
Non-quantifiable wage increases	<p>AAWIs in agreements lodged may not be quantifiable for several reasons, including: if percentage increases vary between classifications in the agreement; if wage increases are awarded only if certain productivity improvements are made; if they are dependent upon individual or company performance; if they are solely linked to future movements in the Consumer Price Index (CPI) or increases in the National Minimum Wage (NMW) or modern award minimum wages following an Annual Wage Review decision. Other reasons may also be considered. These are consistent with the list of reasons recorded in the Department’s Workplace Agreements Database set out at the table in the Trends in Federal Enterprise Bargaining report (p. 49).</p>
Quantifiable wage increases	<p>AAWIs in an agreement are considered quantifiable if they contain wage increases that are consistent for all employees and are known at the time the agreement was made. The report uses wage increases that are specifically stated in an agreement. When these are not stated, wage increases may be calculated through pay tables.</p> <p>Some quantifiable agreements contain a minimum increase with potential higher increases linked to the outcome of economic or other indicators. The minimum increase set out in the agreement is applied in the calculation of the AAWI even though a higher increase may eventuate.</p> <p>If the agreement does not specify the increase in wages from the previous agreement, but a previous agreement has been identified by the employer in the Form F17 at question 7, then this agreement is reviewed to determine if the increase is quantifiable.</p>

1. Enterprise agreement approval applications lodged

Table 1.1: AAWI for agreement approval applications lodged in fortnight

	9 March 2024 – 22 March 2024	23 March 2024 – 5 April 2024
Number of agreement approval applications lodged	192	185
Number of employees covered	116 700	56 812
Median number of employees per agreement approval application lodged	39	54
Effective duration (in years)	2.8	3.1
AAWI (%)	3.9	3.5
Proportion linked to the Consumer Price Index (CPI)		
Agreement approval applications lodged (%)	4.7	1.6
Employees covered (%)	0.4	0.3
Proportion linked to the Annual Wage Review		
Agreement approval applications lodged (%)	6.3	7.0
Employees covered (%)	0.7	13.3
Proportion with consistent wage increases		
Agreement approval applications lodged (%)	26.0	26.5
Employees covered (%)	2.0	30.4
Proportion with higher wage increases on commencement		
Agreement approval applications lodged (%)	39.6	34.6
Employees covered (%)	91.8	41.8

Note: In the latest fortnight, 4.9 per cent of agreement approval applications lodged were Greenfields agreements.

Table 1.2: AAWI for agreement approval applications lodged in fortnight which contained quantifiable wage increases by applicant type

	9 March 2024 – 22 March 2024	23 March 2024 – 5 April 2024
Application lodged by a Union		
Number of agreement approval applications lodged	37	33
Employees covered	219	475
Effective duration (in years)	3.5	4.0
AAWI (%)	4.8	6.2
Application not lodged by a Union		
Number of agreement approval applications lodged	155	152
Employees covered	116 481	56 337
Effective duration (in years)	2.8	3.1
AAWI (%)	3.9	3.5

Note: Applications lodged by a union do not capture all applications with union involvement. Refer to the definition of ‘application lodged by a Union’ in the data definitions section of this report for further detail.
