

## Information note – COVID-19 situation update 28 August 2020

This is a background document only and does not purport to be a comprehensive discussion of the issues involved. It does not represent the view of the Fair Work Commission on any issue.

This information note provides an update of the current rate of transmission of COVID-19 in Australia, with a particular focus on the current spikes in Victoria and New South Wales (NSW).

The Commonwealth Department of Health provides a daily update on COVID-19 cases from when the first case of COVID-19 was detected in Australia in late January 2020. The data show that:

- As at 27 August 2020, Australia has had a total of 25 322 cases of COVID-19, of which 20 361 people have recovered, and 572 people have died.
- 124 new cases have been recorded in the previous 24 hours, the majority of which are from Victoria (113 cases) and NSW (9 cases).<sup>1</sup>

Within the Commonwealth Department of Health, the COVID-19 National Incident Room Surveillance Team has been releasing regular Epidemiology reports since the week of 26 January to 1 February 2020, based on data extracted from the National Notifiable Diseases Surveillance System (NNDSS).<sup>2</sup> The latest of these reports covers the fortnightly reporting period ending 16 August 2020 and, based on data available at that time, found that the number of new cases reported nationally decreased from 5944 in the previous fortnight (20 July to 2 August) to 3767, a 37 per cent decrease.<sup>3</sup> There were 269 cases reported on average per day over the period, a decrease from 425 per day in the previous reporting period.<sup>4</sup> This decrease in cases was likely associated with the enhanced public health measures currently in place in Victoria where 3628 (96 per cent) of cases were reported. The majority of these cases were locally acquired (90 per cent) while the remainder were still under investigation (10 per cent). Of the remaining cases in Australia, 80 per cent were locally acquired.<sup>5</sup> The latest epidemiology data regarding infection rates for the fortnight ending 16 August showed that, among locally-acquired cases, the rate of infection in Victoria dropped from 86.3 per 100 000 population in the last fortnight to 55.0 per 100 000 population. This compares to 1.3 per 100 000 population in New South Wales, with all other jurisdictions reporting an infection rate of less than 0.5 per 100 000 population.<sup>6</sup>

The latest epidemiology report also noted, as at 16 August, that:

‘...75% of cases are reported as locally acquired; 22% are reported as overseas acquired; and 3% remain under investigation.

Of all locally-acquired cases in this reporting period, the source of acquisition for 15% of cases could not be identified, a decrease from 20% which could not be identified in the previous reporting period. This included 6 cases in this reporting period where a contact could not be identified but interstate travel had occurred. occurred.’<sup>7</sup>

Note: The data are obtained from a variety of [state and commonwealth sources](#). Chart shows new daily cases as announced (not net added to total) except for Victoria, which shows official case notification data (due to many duplicate cases announced).

Source: [Coronavirus \(COVID-19\) in Australia](#), covid19data.com.au, 28 August 2020.

More recent data in Chart 1 shows the significant increase in new daily cases in Australia and that the majority are in Victoria, as well as a small but sustained level of new daily cases recorded in New South Wales from late June. Chart 2 highlights the much larger number of cases being recorded in Victoria in July and early August than at the early stages of the epidemic in March. It also shows that cases in Victoria appear to have peaked in early August, gradually falling since then.

On 21 June, the Australian Health Protection Principal Committee (AHPPC) released a statement on recent outbreaks of COVID-19 in Victoria, noting that due to the continued growth in confirmed cases overseas and the number of Australians still overseas who may return; as well as sporadic community transmission in Australia, that it remains probable that Australia will experience periodic outbreaks.<sup>8</sup>

On 20 June, the Victorian Government announced that it would not be easing restrictions as initially planned from 22 June because of the increase in cases. It also reimposed some restrictions, such as limiting the number of people you can have at your home to 5 persons and outdoor gatherings to 10 persons. Restaurants, pubs, auction halls, community halls, libraries, museums and places of worship were limited to a maximum of 20 people in any one space until 12 July and businesses including gyms, cinemas, theatres and TABs could remain open with a maximum of 20 people per space.<sup>9</sup>

The continued increase in daily cases (including community transmission) led to a number of areas in Melbourne return to stage 3 (Stay at Home) restrictions from 2 July. Further areas were added on 5 July, and this was extended to all of Metropolitan Melbourne and the Mitchell Shire would return to Stay at Home restrictions for 6 weeks from 9 July. Under stage 3 restrictions there are only 4 reasons to leave home: shopping for food and supplies; medical care and caregiving; exercise and recreation; and study and work (if it cannot be done from home). Businesses across

these regions will also return to Stage 3 restrictions: restaurants and cafes will return to takeaway and delivery services only; beauty and personal services will need to close; entertainment and cultural venues will need to close; and community sport will stop.<sup>10</sup>

On 19 July, the Victorian Government announced that, from 23 July, people living in metropolitan Melbourne or Mitchell Shire must wear a face covering if they leave their home.<sup>11</sup> On 30 July, it was announced that from 31 July, people living in the local government areas of Greater Geelong, the Surf Coast, Moorabool, Golden Plains, Colac-Otway and Borough of Queenscliffe will no longer be able to have visitors at home, or visit other peoples' homes. From 3 August, face coverings became mandatory for all of Victoria.<sup>12</sup>

At 6pm on 2 August, Victoria entered into a state of disaster and stage 4 restrictions were applied to Melbourne until 13 September. These include a curfew from 8pm and 5am, with the only reason to leave home during these hours being for work, medical care and caregiving. Outside of curfew hours, there are 4 reasons to leave home: exercise (limited to 1 hour a day and to a size of 2 people regardless of if you are in the same household or not); shopping for food and necessary supplies (limited to 1 person per households per day; care and health care; and work. Exercise and shopping for essentials must both be done within a 5km radius of home. Mitchell shire will remain at stage 3 restrictions and the rest of regional Victoria will also move to stage 3 restrictions from 6 August.<sup>13</sup>

On 3 August, further restrictions on businesses and workplaces were announced, commencing from 6 August. Those that can continue to operate are certain retail services (supermarkets, grocery stores, bottle shops, pharmacies, petrol stations, banks, news agencies and post offices) and those involved in the frontline health response. Other retail stores, some manufacturing and administration industries will have to cease onsite operation for 6 weeks. Retail stores not specifically allowed to operate are permitted to operate on a contactless 'click and collect' and delivery services basis. Other businesses in the meat industry, warehousing and distribution centres and construction will be subject to mandated reductions in onsite worker numbers. These workplaces will be required to implement additional safety requirements, including extra personal protective equipment, staggered shifts and breaks, health declarations and more support for sick workers to stay at home. From 6 August, employees working in permitted industries who cannot work from home will be required to have a new 'Worker Permit' when travelling to and from work. All open businesses and services will have until 11:59pm Friday 7 August to enact a COVIDSafe plan.<sup>14</sup>

Chart 3 shows the daily new cases and cumulative cases of COVID-19 recorded in NSW. It shows that although the numbers of cases are lower than the peak of the epidemic in March and April 2020, there have been signs of a gradual increase in new daily cases in June and July. In response, the NSW government announced that from 17 July group bookings at pubs are to be limited to a maximum of 10 people (down from 20) and a cap of 300 people inside a venue at any time was introduced. Further tightening of restrictions took effect from 24 July, with the 10 people

group booking limit extended to restaurants, bars and cafés: a limit of 150 people for weddings and corporate events (subject to the 4 square metre rule); and a limit of 100 people for funerals and places of worship (subject to the 4 square metre rule) also imposed.<sup>15</sup> From 1 August, a limit of 20 people applies to gym and recreation classes such as yoga, tai chi and Pilates. Community sporting activities that involve more than 20 participants must have a COVID-19 Safety Plan and the maximum number of participants must not exceed 500.<sup>16</sup>

From 22 July, people seeking to enter New South Wales from Victoria required an entry permit<sup>17</sup> and may only enter for essential travel, with some exceptions. Victorian residents living in metropolitan Melbourne or the Mitchell Shire are not eligible for entry permits.<sup>18</sup> On 5 August, it was announced that from 7 August New South Wales residents returning to Victoria must go into 14 days mandatory hotel quarantine at their own expense. Some entry permits may indicate requirements on them entering New South Wales (such as needing to self-isolate). Chart 3 shows signs of decreasing daily cases numbers from mid-August.
